

# SPECTRUM

WHERE STYLE

**MEETS  
DURABILITY**

## *Customized Design*

Spectrum phenolic lockers are constructed from high quality Trespa® Athlon® or Virtuon® panels. Due to Trespa's versatility, Spectrum products can be placed in a variety of environments, as it does not delaminate or warp from damp, cold, or hot conditions.

Spectrum phenolic also features a scratch and wear resistant surface, is mold resistant, fire safe, and impact resistant. With its solid core material, you can rest assured that your lockers will always look and perform like new.

**SOLID &  
STURDY**

# STYLISH COLLECTION

Made with aesthetically pleasing colours and finishes, and with the ability to customize your orders, Spectrum produces the market's #1 choice for high-end lockers. Made with phenolic, our lockers are ideal for where areas of high traffic can occur, such as schools, fitness centres, spas, healthcare, and hospitals.

Spectrum phenolic lockers are your absolute best product choice for aesthetics and durability. Our lockers are made from Trespa®. A phenolic material composed of a solid black homogeneous resin core, integrated with a closed cell decorative finish on the outside surfaces. The green guard certified, fire rated materials are available in a vast array of solid colours, metallics, and wood grains, which is a dream come true for designers, architects, engineers, and property owners.

Phenolic is an ideal material and solution for areas of high traffic, and where vandalism and moisture can occur.

Spectrum lockers are constructed of 3/8" (10mm) thick sides, 1/2" (13mm) thick tops, bottoms and shelves. 1/4" (6mm) thick backs and 1/2" (13mm) thick doors. We feature single tier, 2, 3, 4, 5, 6, and Z tier lockers.

While we offer these standard configurations, Spectrum always accepts requests for custom orders. Spectrum lockers follow standard sizes and cater to any custom specification that a project may require.

## STANDARD SIZES

HEIGHT	WIDTH	DEPTH
59-3/4" (1499 mm)	12" (305 mm)	12-3/8" (305 mm)
